Hvordan laver man en god litteratursøgning?

- ❖ Afgrænset klinisk problemstilling
- ❖ Dækkende litteratur database
- ❖ Relevante søgeord
- ❖ Præcis spørgsmålsformulering

Case:

Cathrine, 32 år. Gift. Gymnasielærer. Ingen børn.

Henvender sig på grund af langvarige blødningsproblemer med metrorragi, menorragi og dysmenore.

Vil gerne snart være gravid.

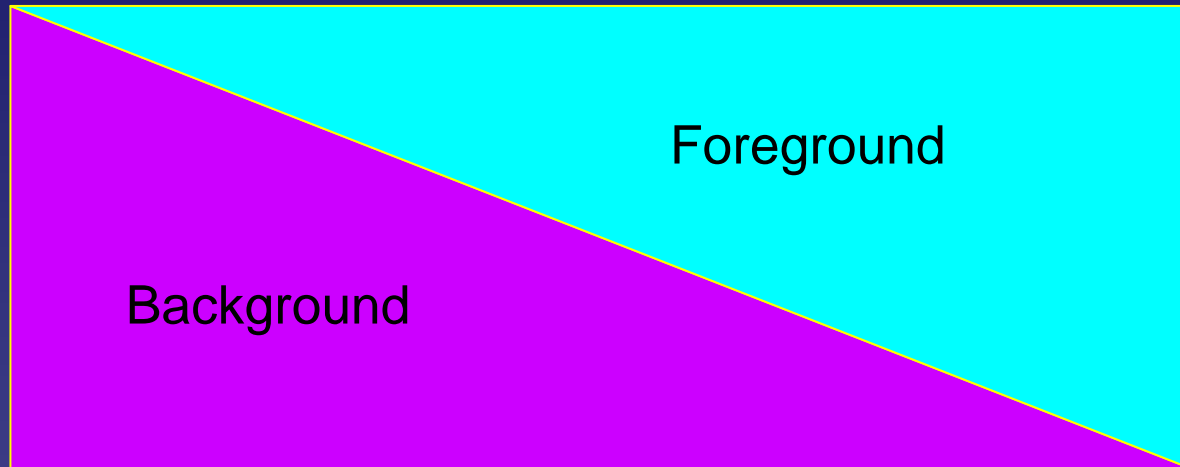

UL-skanning: Submukøst fibrom, 4 cm i diameter. To normale ovarier.

Klinisk problemstilling?

SUMSearch

SUMSearch selects the best resources for your question,
 formats your question for each resource,
 and makes additional searches based on results.

Enter query:

(Search may take 45 seconds during peak Internet activity.)

Produce (or reduce)

Appraising evidence

- Validity
 - Will the study reflect the truth?
- Importance
 - Are the effects big enough to matter?
- Applicability
 - Is it useful here and now?
