

Status på ICD-11

DSOG's nationale kodemøde den 15. marts 2023
Solvejg Bang

ICD-11 på 10 minutter - 2

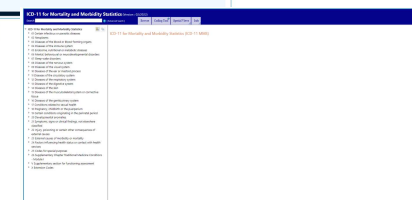

- Siden sidst "ICD-11 på 10 minutter" fra marts 2017...
- ICD-11 i Danmark
- Nyt i ICD-11
- Forskelle mellem ICD-10 og ICD-11 i kapitel 18
- Eksempler på koder og tekster fra SKS, ICD-10 og ICD-11
- WHO-FIC Maintenance Platform (den orange platform)
- ICD-11 Home Page
- ICD-11 International Classification of Diseases 11th Revision (den blå browser)
- Eksempel 1 på postkoordinering (truende abort)
- Eksempel 2 på postkoordinering (blødning postpartum)
- Hvis du vil vide mere...

Kilde: WHO, <https://icd.who.int/doc11a/http://icd.who.int/icd/entry/72192499>

Kilde: WHO, <https://icd.who.int/>

Kilde: WHO, <https://icd.who.int/Browser110/en>

Siden 2017 er ICD-11 blevet udviklet i WHO-FIC samarbejdet...

- 2017: Som svar på medlemsstaternes feedback omkring overgangen til ICD-11, besluttede WHO at der skulle ydes teknisk bistand til medlemslandene således at de kunne udvikle deres **nationale implementeringsstrategier** med henblik på at forbedre sundheden i befolkningen og overvågningen af sygdomsforekomsten
- WHO har gennemført flere **workshops** og de brugere, der er startet implementeringen af ICD-11 tidligt har givet værdifulde erfaringer videre til nye brugere, der ikke var så langt i den proces.
- Den **teknisk support** fra WHO omfatter instruktion i brugen af oversættelsesplatformen og integration af ICD-11 kodningsværktøjet (coding tool) i lokale informationssystemer, samt en løbende dialog.
- Der er etableret en **ICD-11-implementeringspakke**, der indeholder nødvendige oplysninger, værktøjer, træningsmaterialer forslag til kortlægning og andet til støtte for brugen af ICD.
- Den orange **ICD-11 Proposal platform** og oversættelsesværktøj er åbent for alle interesserede og den letter den løbende opdateringsproces, og oversættelsesværktøjet muliggør oversættelser, der kan anvendes i den kliniske hverdag, hvor ICD bruges ([WHO releases new International Classification of Diseases \(ICD 11\)](#))
- 2018: WHO udgav den **18. juni 2018 den første officielle version af ICD-11**. Den indeholder omkring 55.000 unikke koder for skader, sygdomme og dødsårsager, og den giver et fælles sprog, der gør det muligt for sundhedsprofessionelle at dele sundhedsoplysninger over hele kloden.
- 2019: ICD-11 blev vedtaget/**godkendt af den 72. Verdenssundhedsforsamling (WHA) i 2019**
- **2022: 1. januar trådte ICD-11 i kraft som international standard** for sygdoms- og dødsårsagsregistrering og rapportering
- 2023: En opdateret **ICD-11 – 2023 version** er publiceret i februar

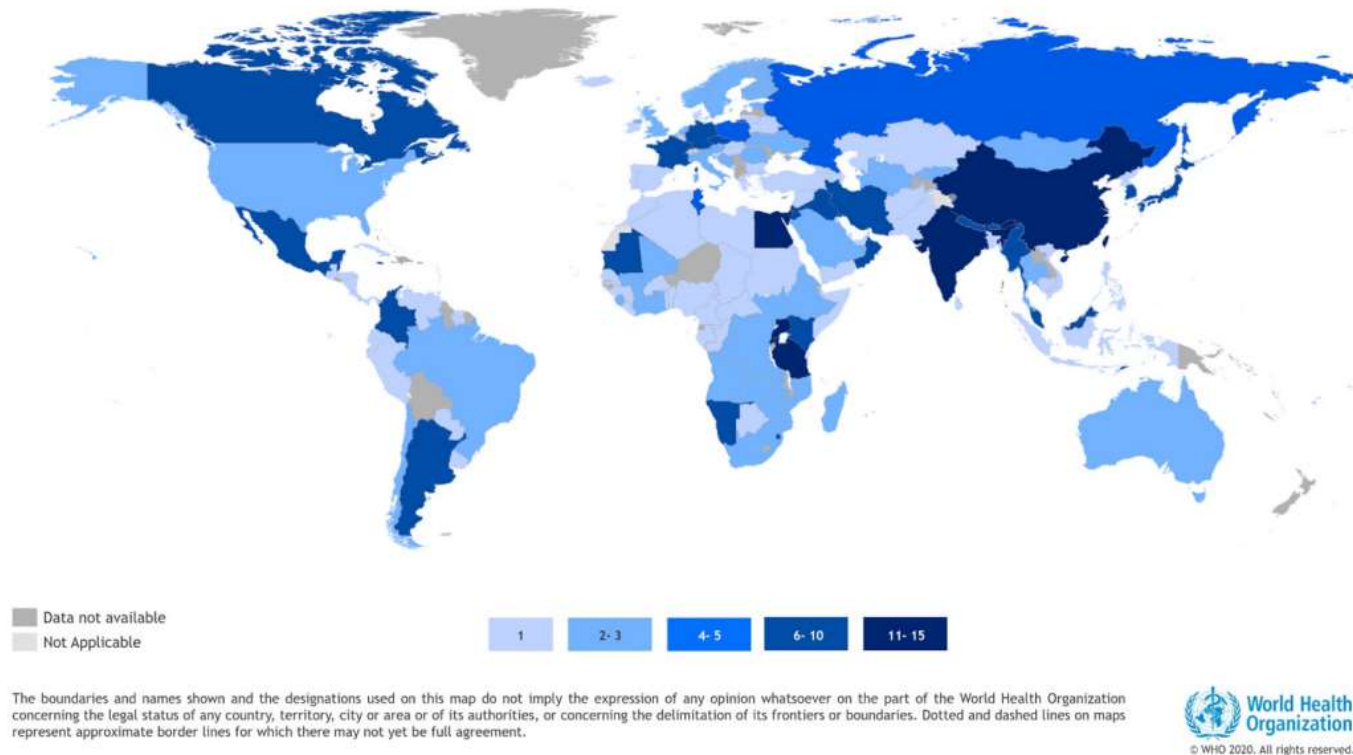

ICD-11 i Danmark – status aktuelt

- Der er blevet gennemført for-analyser i 2019 og 2021 og der pågår aktuelt et modningsprojekt, der har til formål at afklare en række forudsætninger for en vellykket overgang til ICD-11.
- Resultaterne fra modningsprojektet skal sikre, at der etableres et tilstrækkeligt grundlag for, at man kan udarbejde en kvalificeret strategi for implementering af ICD-11 i Danmark – både ud fra klinisk, aktivitetsmonitorerings- og økonomisk perspektiv, og modningsprojektet forventes afsluttet i andet kvartal af 2023.
- SDS er sammen med de faglige selskaber indenfor psykiatri gået i gang med oversættelse af vejledningen '*Clinical descriptions and Diagnostic Requirements*' (CDDR), der knytter sig til kapitel 06 i ICD-11, *Mental, behavioural or neurodevelopmental disorders*.
- Aktuelt er en første rå-oversættelse af CDDR ved at være gennemført, og der forestår nu et større redaktionsarbejde.
- Et forsigtigt og optimistisk bud på en tidshorizont for overgang til ICD-11 i Danmark har hidtil været 2027, men et egentligt implementeringsprojekt for ICD-11 er ikke finansieret endnu, og tidshorizonten heller ikke nagelfast.
- Man kan læse mere om modningsprojektet og finde link til et nyhedsbrev om ICD-11 på SDS' hjemmeside: [ICD-11 – Sundhedsdatastyrelsen](https://sundhedsdatastyrelsen.dk/da/rammer-og-retningslinjer/om-klassefikationer/sks-klassefikationer/icd_11) (https://sundhedsdatastyrelsen.dk/da/rammer-og-retningslinjer/om-klassefikationer/sks-klassefikationer/icd_11)

Nyt indhold i ICD-11 sammenlignet med ICD-10

Nyt i ICD-11 – overordnet set

- **ICD-11 er den første fuldt elektroniske udgave af ICD** og den giver i øjeblikket adgang til 17.000 diagnostiske kategorier med over 100.000 medicinsk-diagnostiske indeksudtryk, som man kan søge på i Coding Tool
- ICD-11 kan installeres og bruges **online eller offline** ved hjælp af gratis 'container'-software
- Forbedringer i ICD-11:
 - ICD-11 afspejler væsentlige **fremskridt inden for videnskab og medicin**, og klassifikationen er tilpasset med den nyeste viden om sygdomsbehandling og forebyggelse.
 - Der er mere **meningsfuldt klinisk indhold** end ICD-10.
 - Et væsentligt træk ved ICD-11 er den lettere og **større nøjagtighed ved kodning**, der kræver mindre brugertræning end tidligere, sammen med tilgængeligheden af online og offline funktion.
- ICD-11 er gjort klar til digitalisering af sundhedsdata til brug i flere it-miljøer med en **ny API**.
- ICD-11 præsenteres sammen med en pakke af web-tjenester inklusive **flersproget support** og indbygget brugervejledning.
- WHO har etableret en **orange vedligeholdelsesplatform**, hvori der er integreret mulighed for at foreslå ændringer eller tilføjelser til ICD-11 hvilket giver transparens i udviklingen af ICD-11 for alle interesserede parter.
- **ICD-11-oversættelsesværktøjet sikrer internationalt konsistente oversættelser og mulighed for tilføjelse af lokalt anvendte medicinske termer**

Nyt indhold

- Koder for **antibiotikaresistens**, på linje med GLASS (The Global Antimicrobial Resistance Surveillance System)
- Nødvendige detaljer for **kræftregistrering** er indlejret i ICD–11
- Specifik kodning for **kliniske stadier af HIV**
- Mere klinisk relevant kodning for **komplikationer til diabetes**
- Koder for **almindelige hudkræftformer** basaliom og melanom undertyper
- Klassificering af **hjerteklapsygdomme og pulmonal hypertension**, som matcher de nuværende diagnostiske og behandlingsmæssige muligheder
- Oprettelsen af udvidede koder giver mulighed for **fleksibel tilføjelse af detaljer**, der er relevante for klinisk dokumentation
- **Ekstensionskoder** giver mulighed for at dokumentere **sværhedsgraden af tilstande, anatomi eller histopatologi**, registrering af **lægemidler** med WHO INN2 (International Nonproprietary Names, dvs. generiske betegnelser) samt WHO Medical Device nomenklatur (en WHO standard for medicinsk udstyr)

- 17.000 kategorier
- 85.000 enheder
- 130.000 termer
- >1.600.000 direkte understøttede udtryk baseret på ontologisk struktur
- Uendelige detaljer med manuelle kodekombinationer

Nyt kapitel

Nyt kapitel

Forskelle mellem ICD-10 Kapitel XV og ICD-11 Kapitel 18 ”Pregnancy, childbirth or the puerperium”

- Kapitellet er blevet omorganiseret, men **indholdet er stadig det samme som i ICD-10.**
- Der er foretaget nogle **ændringer og tilføjelser** til afsnittene ”Maternal care” (pleje af den gravide) relateret til fosteret og amnion (fostervandshulen) og mulige fødselsproblemer og komplikationer ved fødslen
- **Yderligere specifikationer** er inkluderet for ”Early pregnancy loss” (tidligt graviditetstab).
- Der er tilføjet et **nyt afsnit ”Obstetric haemorrhage”** (obstetrisk blødning), så alle typer af blødninger kan grupperes sammen.

3.15.15 Differences between ICD-10 and ICD-11 in Chapter 15

3.15.16 Differences between ICD-10 and ICD-11 in Chapter 16

3.15.17 Chapter 17 is a new addition to ICD-11 and was not found in past editions

3.15.18 Differences between ICD-10 and ICD-11 in Chapter 18

3.15.19 Differences between ICD-10 and ICD-11 in Chapter 19

3.15.20 Differences between ICD-10 and ICD-11 in Chapter 20

3.15.21 Differences between ICD-10 and ICD-11 in Chapter 21

3.15.22 Differences between ICD-10 and ICD-11 in Chapter 22

3.15.23 Differences between ICD-10 and ICD-11 in Chapter 23

3.15.24 Differences between ICD-10 and ICD-11 in Chapter 24

3.15.18 Differences between ICD-10 and ICD-11 in Chapter 18

The chapter has been reordered but content remains similar to that in ICD-10. There have been some changes and additions made to the sections Maternal care related to the fetus and amniotic cavity and possible delivery problems and Complications of labour and delivery. Additional specifications have been included for "Early pregnancy loss". A new section Obstetric haemorrhage has been added to enable all types of haemorrhage to be grouped together.

Table 1: Comparison of ICD-10 block structure with ICD-11 equivalent structure

ICD-10 block heading	ICD-11 equivalent structure
000-008 Pregnancy with abortive outcome	Abortive outcome of pregnancy
O10-O16 Oedema, proteinuria and hypertensive disorders in pregnancy, childbirth and the puerperium	Oedema, proteinuria, or hypertensive disorders in pregnancy, childbirth, or the puerperium
O20-O29 Other maternal disorders predominantly related to pregnancy	Certain specified maternal disorders predominantly related to pregnancy
O30-O48 Maternal care related to the fetus and amniotic cavity and possible delivery problems	Maternal care related to the fetus, amniotic cavity or possible delivery problems
O60-O75 Complications of labour and delivery	Complications of labour or delivery
O80-O84 Delivery	Delivery
O85-O92 Complications predominantly related to the puerperium	Complications predominantly related to the puerperium
O94-O99 Other obstetric conditions, not elsewhere classified	Certain obstetric conditions, not elsewhere classified

3.15.19 Differences between ICD-10 and ICD-11 in Chapter 19

There has been some reordering of this chapter but it remains similar to that in ICD-10. There is new grouping for Neurological disorders specific to the perinatal or neonatal period and an expansion of codes for gestational age of the

18 Pregnancy, childbirth or the puerperium

ICD-10 : XV ?

Description

A group of conditions characterised as occurring during the period of time from conception to delivery (pregnancy), during labour and delivery (childbirth) or during the approximately six weeks after delivery during which the uterus returns to the original size (puerperium).

Exclusions

- Postpartum necrosis of pituitary gland (5A61.0)
- Obstetrical tetanus (1C14)
- Injury, poisoning or certain other consequences of external causes (NA00-NF2Z)

Coded Elsewhere

- Gestational trophoblastic diseases ()
- Contact with health services for reasons associated with reproduction (QA20-QA4Z)

All Index Terms

There are no index terms associated with this entity

Coding Note

The codes included in this chapter are to be used for conditions related to or aggravated by the pregnancy, childbirth or by the puerperium (maternal causes or obstetric causes)

Missed abortion

Parent(s)

- Abortive outcome of pregnancy

ICD-10 : O02.1 ?

Description

A condition caused by genetic abnormality, abnormal cell division, or poor quality ovum or sperm. This condition is characterised by a failed pregnancy, immature fetal or embryonic death that is not expelled from the uterus for at least 8 weeks, and diminished uterine size. This condition may also present with maternal infection, blood clotting, fetal calcification, and resorption of conception products. Confirmation is by imaging.

Synonyms

- Early fetal death with retention of dead fetus *
- missed miscarriage
- silent miscarriage
- MA - [missed abortion]
- early dead fetus retained
- early fetal death with retention

Exclusions

- Blighted ovum or nonhydatidiform mole =>
- Molar pregnancy =>

O02.1 Missed abortion

Early fetal death with retention of dead fetus

Excl.: missed abortion with:

- blighted ovum (O02.0)
- mole:
 - hydatidiform (O01.-)
 - nonhydatidiform (O02.0)

O02.8 Other specified abnormal products of conception

Excl.: those with:

- blighted ovum (O02.0)
- mole:
 - hydatidiform (O01.-)
 - nonhydatidiform (O02.0)

O02.9 Abnormal product of conception, unspecified

O03 Spontaneous abortion

[See before O03 for subdivisions]

Incl.: miscarriage

O04 Medical abortion

[See before O03 for subdivisions]

Incl.: termination of pregnancy:

- legal
- therapeutic

therapeutic abortion

O05 Other abortion

[See before O03 for subdivisions]

18 Pregnancy, childbirth or the puerperium

Description
A group of conditions characterised as occurring during the period of time from conception to delivery (pregnancy), during labour and delivery (childbirth) or during the approximately six weeks after delivery during which the uterus returns to the original size (puerperium).

Exclusions

- Postpartum necrosis of pituitary gland (5A61.0)
- Obstetrical tetanus (1C14)
- Injury, poisoning or certain other consequences of external causes (NA00-NF2Z)

Coded Elsewhere

- Gestational trophoblastic diseases ()
- Contact with health services for reasons associated with reproduction (QA20-QA4Z)

Coding Note
The codes included in this chapter are to be used for conditions related to or aggravated by the pregnancy, childbirth or by the puerperium (maternal causes or obstetric causes)

Fordele og ulemper samt nyttige links

Fordele og ulemper ved at overgå til ICD-11

- Standardiserede internationale koder, med tekster, der er lette at sammenligne på tværs af lande/sprog
- Bedre datagrundlag for international sammenlignelig statistik indenfor sundhedsområdet
- Bedre mulighed for at sammenligne sundhedsdata
- Bedre mulighed for at kunne forske i data
- Bedre patientregistrering med flere detaljer
- Ulempe: skift i klassifikation er en udfordring for sammenligning af data over tid
- Ulempe: alle brugere skal lære at benytte den nye version af ICD, og den nye klassifikation har ikke samme kodestruktur

Med ICD-11 får vi en sygdomsklassifikation der

nærmer sig at være en klinisk terminologi

- Næsten dobbelt så mange diagnoser
- Klinisk relevante muligheder for at præcisere en diagnose

afspejler en mere nutidig sygdomsopfattelse

- Stor opdatering af psykiatrikapitlet
- Nye kapitler
 - Sygdomme i immunsystemet
 - Søvn-vågen-forstyrrelser
 - Forhold relateret til seksuel sundhed

er designet til at understøtte sundheds-it

- Mulighed for at udstille alle informationer om diagnosen på brugergrænsefladen
- Grundlag for AI, beslutnings- og processtøtte
